Create a humanized learning experience for your students

Modernize Your Discussion Boards
Transform current discussion boards into dynamic video based collaboration that can be done live or asynchronously. Take it one step further with the web conferencing tool for face-to-face interactions.

Assessments
Throughout the learning experience, students have multiple ways in which to prove their level of competence. Enhance your formative and summative assessments through live and asynchronous demonstration with a faculty member.

Mobile Usability
Provide on-demand learning opportunities that are mobile-first and can be accessed from anywhere and from any device. Deliver knowledge through an app that can be immediately accessed via mobile or desktop device.

Multiple Communication Modalities
Whether you need to chat, video conference, share notes, files or images, our system offers a full collaborative experience. All communication methods can be mobile delivered with push notifications to streamline the experience for all active users.

Workforce Development
Expand your workforce development opportunities from full degree programs into microcredentials that upskill learners. Incorporate workforce credentials to help any learner attain the skills they need.
