Use video and audio assessments to determine competency and knowledge acquisition; supports multiple learning styles, international student language acquisition, and the preferences of working adults.

Create an environment where students are continually supported in their language acquisition through fully transcribed videos, content, and supporting material.

Allow students to demonstrate language acquisition across the spectrum, from written posts to spoken video messages.

Move communication and documentation from Whatsapp into our secured platform where you can search and retrieve all interactions with students.

If you have concerns around plagiarism, add a level of assessment that requires students to demonstrate what they know through video-based assessments.

When you think about intentional student services, instruction and curriculum, and personalized support and assessment, begin including your international student population within that intentionality.
